

# The TrustCoM project

is developing a framework for trust,  
security and contract management within  
dynamic virtual organisations  
supported by service oriented  
architectures implemented using Web  
Services and the Grid.

## TrustCoM

An EU funded  
Integrated  
Project

Information Society  
Technologies

The TrustCoM project is partially funded under  
the EU IST programme for 3 years from  
February 2004 under contract 01945
