

THE ISSUE

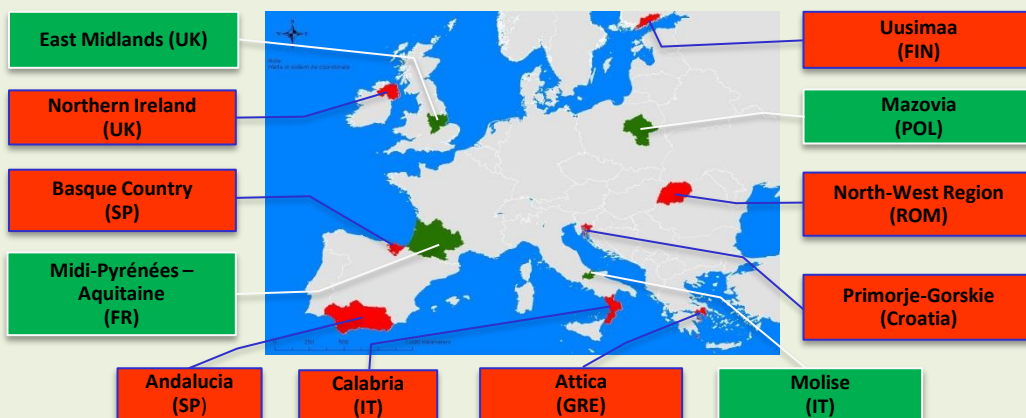

Traffic Health Environment
Intelligent Solutions for Sustaining Urban Economies

MAIN OBJECTIVE

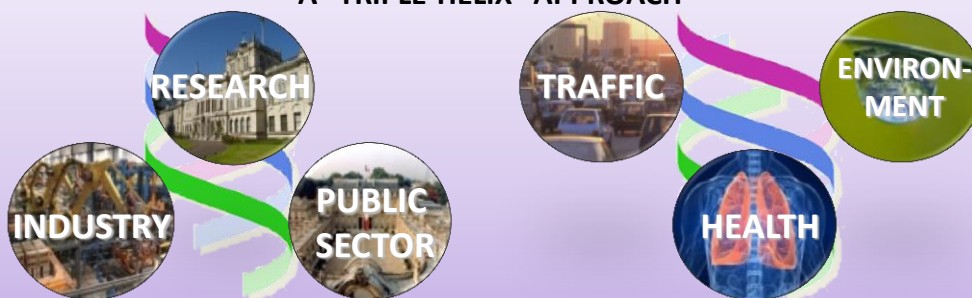

Prepare a coordinated Research, Technological Development and Innovation (RTDI) Programme that builds on THE ISSUE Consortium's capabilities in ICT and downstream space data and services to support smart, green integrated transport and urban mobility and respond to six key "Societal Challenges" facing transport and urban mobility:

1. Addressing traffic congestion and associated impacts on the urban environment and infrastructure.
2. Managing urban air quality and greenhouse gas emissions.
3. Enhancing the utilization, planning and optimization of urban and regional road networks.
4. Promoting urban transport, mobility, intermodality and interoperability.
5. Improving safety, security and health of urban communities.
6. Introducing disruptive innovation for sustainable urban mobility.

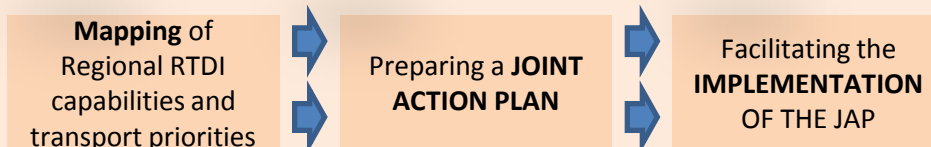

4 CORE REGIONAL RESEARCH-DRIVEN CLUSTERS AND 8 ASSOCIATE REGIONS

A "TRIPLE-HELIX" APPROACH
