

*Phase I*

WP1 - Requirements

WP2 - Definition and development of equipment for ground testing

Objectives

1

WP3- de-icing strategies & concepts for combined de-icing systems

2

WP4 - Concept development for improved icing sensors

3

*Phase II*

WP6 of improved active de-icing prototypes for combined devices

WP7 - Development of prototypical sensing device

WP5 - Development of prototypical anti-icing coatings

*Phase III*

WP8 - Ground tests for in-flight simulation

WP9 - System integration

**JEDI ACE Integrated Ice protection system**

Results

Impact

WP10 - Dissemination & Exploitation

WP11 - Management
